

wrap long text

## Wrap long lines

Long lines in the output will not be (hard-)wrapped automatically unless you break them manually.

```
a <- '## "stx2A; shiga-like toxin II A subunit encoded by bacteriophage BP-933W; K11006 shiga toxin sub  
a
```

```
## [1] "## \"stx2A; shiga-like toxin II A subunit encoded by bacteriophage BP-933W; K11006 shiga toxin s
```
